MADE IN AMERICA: CBC TO OPEN \$300 MILLION AMMUNITION PRODUCTION FACILITY IN OKLAHOMA

Oklahoma (May 12th, 2025) - CBC, a world leader in ammunition for portable weapons, is expanding its global footprint with a major investment in the United States. The company today announced the launch of **CBC USA**, a state-of-the-art ammunition manufacturing facility in Oklahoma, representing a \$300 million investment and the creation of 350 new jobs in the region.

The new facility reinforces CBC's long-term commitment to the U.S. defense industry and domestic manufacturing. As part of CBC Global Ammunition, **CBC USA** brings over a century of expertise to the U.S. market, establishing one of the country's most advanced and vertically integrated ammunition production operations.

"We are thrilled to bring our new manufacturing operations to Oklahoma," said Fabio Mazzaro, President of CBC and board member of CBC Global Ammunition. "This facility will be a cornerstone for our future growth in the world's most important market for small caliber ammunition. With in-house production of all components, propellant, and critical energetic raw materials, we envisage to build an industry-leading and fully vertically integrated company. We believe that the region's supportive business environment makes Oklahoma an ideal location for **CBC USA**".

CBC Global Ammunition, the holding company for an international group in the ammunition sector, is one of the world's leading producers of military and civilian small-caliber ammunition. A key supplier to the United States military and allied forces worldwide, CBC also serves law enforcement and commercial markets. Magtech Ammunition Inc. acts as its master distributor in the U.S. for all brands within the group.

CBC USA will manufacture a full range of cartridges, including 9mm, 5.56mm, 7.62mm, and .50 BMG, serving military, law enforcement, sport shooting, self-defense, and hunting markets. The facility will replicate CBC's world-class manufacturing processes, ensuring full control over critical components—cases, bullets, primers, powder, and nitrocellulose, a key energetic material in global short supply.
